### 14.1.3 Construction Schedule:

It has been assumed that approval of feasibility report will get done in this months (March 2022). It will take another 6 months (till September 2022) to finalize the tender process and award of LOA to the concessionaire. After that 1 year will be given to the concessionaire as a condition precedent for financial closure and NOCs required for this project. After financial closure, a project construction period of three years has been taken. The table below shows tentative timelines assumed for financial analysis of this project.

*Table 14:3 Construction Schedule*

### 14.2 Capital Expenditure and Investment Schedule

The estimated capital investment schedule has been prepared on the basis of Civil, Electrical and Mechanical cost estimates for construction period alongwith other cost components like Contingency charges, Clearance charges, consultancy charges, Independent Engineer charges, SPV Organizational Charges, Financing charges and Insurance Charges. The IDC of each year is added to the capex requirement. The total of capex and IDC will be raised through debt and equity. The capex which has been considered for the financial analysis is shown in the table below.

### 14.3 Project Funding Structure: -

For the financial analysis of the project, the following were calculated:

- i. Debt scheduling
- ii. Equity scheduling
- iii. Interest During Construction (IDC)

The project has been assumed to be funded at debt and equity in the ratio of 70%:30% and 80%:20%. Most of the capex in the beginning will be funded via equity. Hence in the overall scheme equity is front loaded with debt being availed after exhaust of equity. This is in line with the funding norms of infrastructure projects. The amount of debt required in a year is based on the investment phasing schedule, so as to ultimately achieve a final debt: equity level of 70:30 or 80:20. As this is the construction of a new project, we have assumed the opening balance for loan in the first year of investment as zero. The rate of Interest has been taken at 10.0%. The calculated project costs using the base costs, their phasing and funding assumptions (as mentioned above) are shown above.

#### **14.4 Revenue Estimate:**

The revenue is calculated in two categories, one is fare box revenue and other is non fare box revenue which is from sources like commercial spaces or advertisement etc.

##### **14.4.1 Revenue from Passenger: -**

Revenue has been computed on the basis of estimated traffic which is for a fare of Rs 350 for Triveni Ghat to Neelkanth Mahadev Temple. The base fares are assumed from the year of operation i.e., 2026-27.

The calculation of Weighted average fare per passenger in the year 2026-27 is as per para 6.8.3.2 percentage ridership:

Sr. No.	Section	Percentage of total passenger	Fare	Fare x % passenger
1	Triveni Ghat- Neelkanth Mahadev	100%	Rs. 350/-	Rs. 350

The Fare box revenue has been calculated by multiplying the total ridership with weighted average fare per passenger calculated above. Fare box revenue different years is as under:

Table 14:6 Fare Revenue Calculation

Description	Traffic on Ropeway (in Cr) Ref: Table:6:39	Fare in Rs.	Revenue from Passengers in Cr. (Rs.)
<b>Yr 2027-28</b>	0.365	367.50	138.03
<b>Yr 2031-32</b>	0.408	446.70	187.55
<b>Yr 2036-37</b>	0.472	570.11	276.93

<b>Yr 2051-52</b>	0.759	1185.22	925.15

**Note:** This is as per assumption that the Commercial Operation Date (COD) is 1 October 2026. If COD is shifted then revenue receipt will also shift to future date accordingly.

#### 14.4.2 Non-Fare Box Revenue:

The non-fare revenue can be considered from the retail/ commercial space, advertising and parking from vehicle.

Revenue from these sources is considered at an average of Rs.10/- per passenger from the previous experience.

Description	Non Fare Revenue

### 14.5 Operation and Maintenance Expenditure

An assessment of the operation and maintenance requirements has been made. This is essential not only to get an indication of the method of working of the system but also to enable proper financial evaluation of the project.

Operation & Maintenance of the ropeway system shall be carried out in accordance with the recommendation of manufacturer of the equipment such as Gear Box, Motors, Coupling, Control Panels, Carriage, Hangers, Cabin & Haulage ropes etc. The basic requirement of manpower for running a Ropeway project should be categorized as follow: -

### 14.6 Result of Financial Analysis

The projected financial statements of the project are provided below.

#### 14.6.1 Output of Financial analysis

Following are the financial indicators of the project for a concession period of 30 years.

##### 14.6.1.1 Minimum Return Criteria for the Project

For any project to be viable under PPP or any of its variant, the minimum return criteria for the project is assumed based on experience and present trends in Ropeway projects. This is to ensure the attractiveness of the project and to ensure returns to the concessionaire as per the sector trends.

Following Minimum Return Criteria for the Project has been adopted:
